# AMP Rapid Test SARS-CoV-2 IgG/IgM

AMP Rapid Test SARS-CoV-2 IgG/IgM is a rapid immuno-chromatographic test for qualitative detection of IgG and IgM antibodies to Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) in whole blood, serum and plasma as an aid in quick and efficient diagnosis of Corona Virus Disease 2019 (COVID-19).

The test is easy to use and can be performed even without the availability of laboratory environment. As the result is available within 10 minutes the test is a valuable tool for efficient screening in case of suspected SARS-CoV-2 infection.

Clinical studies in comparison with RT-PCR evidenced high sensitivity and specificity of both the IgG and IgM test.
